Manual testing on Samsung Galaxy Sky			**Samsung Galaxy Sky (Android 6.0.1), Genymotion emulator of Google Pixel (Android 7.1)**				
SW Version 1			**Version 1**				
Note: When run on Amazon Device Farm, the default explorer tester does not actually run any tests							
Test ID	**Test Scenario**	**Components Involved**	**Platform**	**Test StepsTest Description (Steps)**	**Actual Results**	**Pass/Fail**	**Priority**
Unique ID for every test case	Title that describes what you are testing	if needed, describe components involved in your test	For example: Samsung S7, Android iOS Safari Browser IE, etc.	Step by step description for the test in order to be able to reproduce results	Description of results. This can include media to show what happened.		Critical High Medium Low
1	Login		Samsung Galaxy Sky and Genymotion emulator of Google Pixel running Android 7.1	From both physical device and emulator, press the login button, login to a different Google account on both emulator and physical device, then see if you are able to log in successfully	Results are exactly as expected from the test description	PASS	
2	Logout		Samsung Galaxy Sky and Genymotion emulator of Google Pixel running Android 7.1	From both the physical device and emulator, after logging in, press the logout button from the menu in the top right corner, and see if logging out is able to be successfully done	Results are exactly as expected from the test description	PASS	
3	Post regular message		Samsung Galaxy Sky and Genymotion emulator of Google Pixel running Android 7.1	Post a message that does not include any swear words, and see if that message gets successfully posted. The posted message should appear in the list of messages in the chat	Results are exactly as expected from the test description	PASS	
4	Post message with swear words		Samsung Galaxy Sky and Genymotion emulator of Google Pixel running Android 7.1	Post a message that includes swear words. Each instance of a swear word should be replaced with *BLEEP*	Results are exactly as expected from the test description	PASS	
5	Block user		Samsung Galaxy Sky and Genymotion emulator of Google Pixel running Android 7.1	From the account designated as an admin account (as manually set in Firebase), block a logged-in user from posting a message. The user that has been blocked should be unable to post a message and should be presented with a Toast message saying that he/she has been blocked from posting.	Results are exactly as expected from the test description	PASS	
6	Unblock user		Samsung Galaxy Sky and Genymotion emulator of Google Pixel running Android 7.1	From the account designated as an admin account (as manually set in Firebase), unblock a logged-in user that has previously been blocked. The user that previously should have been unable to post should be able to post messages again.	Results are exactly as expected from the test description	PASS
